Sample PLATINUM RUNTZ

Sample ID SD230307-006 (67355)		Matrix Concentrate (Inhalable Cannabis Good)	
Tested for Carats			
Sampled -	Received Mar 06, 2023	Reported Mar 17, 2023	

Analyses executed CANX

Laboratory note: The estimated concentration of the unknown peak in the sample is 2.96% | Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)d8-THC or d9-THC. At this time there are no reference standards available for (+)d8-THC. (+)d8-THC is a different compound from the main (-)d8-THC cannabinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available to be 65.1% to be 65.5% of (+)d8-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)d8-THC and d9-THC with the majority, if not all, of the concentration being (+)d8-THC. Total (+/-) D8 concentration is estimated to be 65.5%
